

# WEB HACK TECHNICAL SPECIFICATIONS

## **What is Uma Equipa (Who are we?)**

Uma Equipa is a South African based multidisciplinary company currently with an active ICT (Information Communication and Technologies) department and dormant engineering consulting, property acquisition, research and development and community engagement (volunteering) departments. A start-up company that is aimed at generating or acquiring technology, developing them to provide products and services that are aimed at making Africa more efficient and prosperous for all.

## **Welcome to WEB HACK**

Web hack is a competition hosted by Uma Equipa in order to attract, stimulate and develop Information technology talent. The program is aimed at taking participants through a challenge of creating a cutting edge and professional website. This will stimulate them to think beyond their curriculum and perform at a level that will develop their creative design and programming.

## **The participants' objective**

Your goal will be to use the skills that you possess and attain those that you will need in order to create a world class, professional website. There are no limitations to your application of your mind. The site is preferably, but not limited to being the style, parallax scrolling. The platform and language used to create the site is also your prerogative.

# Technical Specifications

The following is a list of mandatory specifications for the site. The objective of the site is such that clients are able to find the company, learn about the value proposition and be able to contact us.

- The site must have the following tabs/pages/sections, in any variations of wording that makes sense and easy to comprehend
  - o Home
  - o About Us
  - o Projects (Solution)
  - o News Room'
  - o Get in touch
- There must be a space for an embed video under a tab/page/section titled “news room”
- There must be an embedded slideshow on the “home page”, this can be in the background and come forward when hovered or visible from the beginning.
- The target audience for the site is a professional audience such as companies, public organisations and well established non-profits, which is looking for cutting edge innovative IT solutions.
- Search engine spiders must be able to access the site.
- The site must be built with considerations of search engine optimisation (content for relevant content)
- Minimalistic design should be implemented.
- The site must be as bug free to the most possible degree considering time constraints.
- The content that will be used will be “dummy content” that will fill the text spaces, pictures and video. If specific content is required for the effective creation of the site in some way, it may be requested.
- The discretion is left to you as how to structure the subpages however consideration of standards and the target audience must be kept in mind for example:

- o The about us page would be expected to have company mission, values and history.
